

SABAF: AGREEMENT SIGNED WITH CLEAN COOKING ALLIANCE TO SUPPORT THE CULTURE OF SAFE AND CLEAN COOKING AROUND THE WORLD

Ospitaletto (BS), January, 20, 2026 - Sabaf S.p.A. has signed a **collaboration agreement with the Clean Cooking Alliance (CCA)**, an international organization that promotes access to clean cooking solutions with the aim of bringing benefits to health, the environment, and social and economic development.

Sabaf will support the organization by continuing to develop advanced technological solutions that guarantee ever-greater combustion efficiency, thus contributing to the reduction of CO₂ emissions into the atmosphere.

The **CEO of Sabaf, Pietro Iotti**, says: *"We are proud to announce our new collaboration with the Clean Cooking Alliance (CCA), an organization that shares our concrete and ambitious vision: building a more sustainable energy future."*

As a global manufacturing company with a significant focus on home appliances, we place the highest priority on developing high-quality products while respecting both the environment and workers' safety. Our collaboration with CCA is a natural extension of this commitment, stemming from the belief that sustainability is not only an environmental issue, but also a social one: supporting access to safer and more efficient cooking methods means protecting people's health, reducing inequalities, and creating economic development opportunities for millions of people. At the same time, reducing emissions from polluting, inefficient cooking—still used by 2.1 billion people worldwide—helps improve air quality, safeguard health (particularly for women and children), and combat forest degradation and climate change.

Through this collaboration, we are committing resources and expertise, to support concrete initiatives where we can add the greatest value, such as providing technical knowledge and training on consumer research and innovations in energy efficiency. We do this because we believe that industrial progress must go hand in hand with collective well-being and environmental protection.

We are excited to begin this journey and are confident that, by joining forces, we can create a lasting, positive impact."
