

SABAF[®]

TECHNOLOGY AND SAFETY

FRANKFURT

24 Septemeber 2008

Sabaf and its sector

- Among few players, Sabaf keeps a strong leadership, widening the gap towards the competitors
- Automation, technical competence and economies of scale are basic needs to be on the market
- Growing industry, due to:
 - Higher technical complexity and increasing value of the components
 - Outsourcing from household manufacturers
 - Growing need for safety and efficiency
 - Attention to environmental matters

Strategy 1 – Enhance technological leadership

- We will focus on organic growth
- We will keep full control of the production process
 - Unique know how in joint product and process engineering
 - High degree of vertical integration
 - Our products set the standard for the market
- Internal engineering and construction of technical assets not available on the market
 - Special, personalized machinery
 - Robotic die-casting and automated equipment
 - High precision and high performance tools
- Average capex at 15% of sales in the last 8 years
- > 10% of workforce employed in R&D and Equipment Departments

Strategy 2 – Enhance market leadership

We aim to:

- Further increase market share in Europe (today around 50%)
- Catch huge opportunities outside Europe
- Build long term partnerships together with clients
- Optimise the customer base

Strategy 3 – Product innovation

- Sole provider of the full range of components
- We have the most innovative and advanced product portfolio
- Starting from 2006 we have introduced a new generation of valves in aluminium

	Brass valves	Aluminium alloy valves
<i>Product performance</i>		progressive flow rate
<i>Production process</i>		Hot pressing eliminated Sophisticated machining technology Higher process rhythm in high value operations
<i>Weight of finished product (g) *</i>	73,2	31,1
Raw material price Jan 06 to Sep 08 (in €)	+40%	+7%
<i>Lead content (g) *</i>	2,24	0,30
<i>Energy content (kwh/unit) *</i>	0,303	0,218

* simple valves

The introduction of light alloy valves

EUR x 000

units

Profitability of light alloy valves

Simple valves

- main goal: to build a higher barrier towards existing competitors and potential new entrants
- focused on gaining share in emerging markets (South America, Turkey)
- full-run profitability: low

Safety valves

- main goal: to gain further competitiveness through innovation
- focused on gaining share in the European market and in some emerging markets
- full-run profitability: in line with brass safety valves
- full-run expected by the end 2008 for safety valves for hobs, by the end of 2009 for safety valves for cookers

Compulsory safety in Europe

Flame supervision device *" a device which, under the influence of the flame on the detector element, holds open a supply of gas to the burner, and which shuts off this supply of gas in the event of extinction of the supervised flame"*

European legislation EN 30-1-1 is expected to be revised in the short term, introducing compulsory safety, Meanwhile, national legislations are evolving:

- Germany, France, Italy, Great Britain, Ireland standards are already requiring the presence of the flame supervision device

Capex 1998-2008e

Forecasts 2008

- Sales at EUR 170 - 175 mn (+7,5% - +10,7%)
- Growing share in valves both in Europe and worldwide
- EBIT at 15%
- Capex at about EUR16 mn
 - Completion of production lines for safety light alloy valves for cookers and for hobs
 - New capacity for burners production in Italy and Brazil

Disclaimer

Certain information included in this document is forward looking and is subject to important risks and uncertainties that could cause actual results to differ materially, The Company's business is in the domestic appliance industry, with special reference to the gas cooking sector, and its outlook is predominantly based on its interpretation of what it considers to be the key economic factors affecting this business, Forward-looking statements with regard to the Group's business involve a number of important factors that are subject to change, including: the many interrelated factors that affect consumer confidence and worldwide demand for durable goods; general economic conditions in the Group's markets; actions of competitors; commodity prices; interest rates and currency exchange rates; political and civil unrest; and other risks and uncertainties,
