Business model

- Among few players, Sabaf keeps a strong leadership in the business of components for cooking appliances
- Competitive advantage based on:
 - Product and process know-how
 - Process automation
 - Economies of scale
- The components industry tends to grow faster than the appliance market, thanks to:
 - Higher technical complexity and increasing value of the components
 - Outsourcing from household manufacturers
 - Growing need for safety and efficiency
 - Focus on environmental matters

Analysis by market - Italy

Sabaf enjoys a consolidated presence on the Italian market, leveraged by the most complete and innovative product range

Future strategies are primarily driven towards product differentiation and higher energy efficiency, to cope with a relatively stagnant market and growing pressures from emerging countries

Analysis by market – Western Europe

As well as the Italian players, the appliance manufacturers in Western Europe risk to suffer competition from emerging countries

Relying on the quality and the constant innovation of its product range Sabaf plans to consolidate its customer base

Analysis by market – Eastern Europe & Turkey

Sabaf tends to benefit from the expected growth in Eastern European countries, with a specific focus on Turkey

The set-up of a manufacturing plant in Turkey during 2012 and the development of new commercial relationships represent key elements

Analysis by market – South America

A large and fast growing market makes South America a priority in Sabaf strategy

Sabaf's presence here is well consolidated (a factory in Brasil was set up in 2001)

Safety standards could improve, opening new opportunities

Analysis by market – Asia & Oceania

A boosting demand, along with probable stricter safety standards, represent growth opportunities for Sabaf

Young people tend to westernize their lifestyles, also as regards furniture and appliances

Sabaf's universally reknown brand and "made in Italy" represent an important premium in all the Asian markets

Analysis by market – Africa

Huge housing market plans for new married young people represent an opportunity in North African markets, as soon as the political situation stabilizes. Leveraging on geographical proximity and long-term presence, Sabaf targets to increase its market share in the area

Analysis by market – North America & Mexico

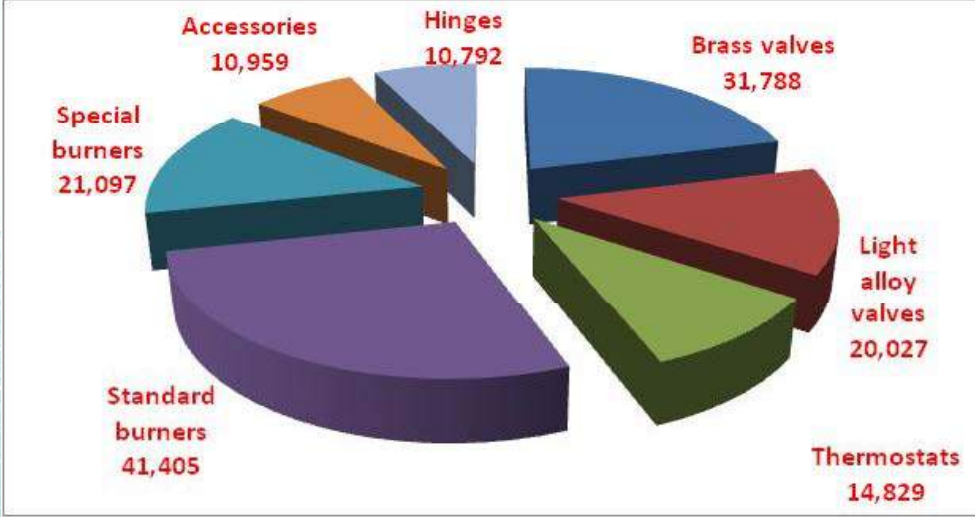

A wide range of innovative and efficient products, good commercial relationships and excellent technical reputation make Sabaf ready to exploit new opportunities in North America

A growing focus on safety is also emerging

Raw material incidence on an extruded aluminium gas valve for freestanding range is lower than 5%

Raw material incidence on a forged brass gas valve for freestanding range is about 30%

New products

➤ Serie II High Efficiency burners, AE & AEO

➤ DUAL wok High Efficiency burners
AE, AEO and TORCH

➤ Sabaf oven burner

➤ New aluminium valve

Double Ring Dual High Efficiency burners

Sabaf new double ring dual are designed to be the most flexible, high efficiency and eco-friendly multiple flame ring burners in the market place.

They are available in three different versions:

AE (High Efficiency) – aluminium alloy flame spreader

AEO (High Efficiency brass version) – brass ring flame spreader

TORCH –brass flame spreader

Flexible – Platform concept

Using the same injector holder (applicable both on standard steel tops and ceramic glass ones) it is possible to fit **eight different flame spreaders**.

This platform concept allows the OEMs to reduce investments with a huge opportunity to diversify the aesthetics of the top of the appliances using different and interchangeable flame spreader versions.

Moreover the injector holder can have one or two inlets:

Single inlet – all rings of flame work simultaneously

Double inlets – inner and outer rings of flame work separately

Efficiency

Standard level of efficiency for triple or double ring of flame is about 52 – 53%

New Double Ring Dual burners have an **efficiency over 60%**

Eco-friendly

Increasing efficiency automatically reduces gas consumption resulting in lower pollution and carbon monoxide emissions.

Serie II AE & Serie II AEO – Power & Efficiency

	Auxiliary	Semi Rapid	Rapid	Ultra Rapid
Maximum Output (kW)	1.00 kW	1.75 kW	3.00 kW	3.60 kW

FY 2012 forecasts

The household appliance market in Europe continues to struggle at the start of 2012, while the outlook on other markets is encouraging.

For FY 2012, the Group believes that it will be able to register sales and profitability levels in line with those of 2011.

However, compared with 2011, the Group expects a weaker first half of the year and a gradual recovery in the second half, partly thanks to the contribution of new supply contracts that will gradually come into force over the year.
