

SABAF: NEW WEBSITES TO BETTER RELATE THE GROUP

The new websites encompass the Group's values and the cross-cutting offer of the individual companies, giving a new shape to the synergies between brands.

The strength of a Group derives from the synergies existing between its various components and the solidity that is transmitted by an entity that is united, motivated and prepared to meet the expectations of its stakeholders. It is also for this reason that the **Sabaf Group, an Italian multinational and world reference point in the production of components for household appliances**, has decided to launch a new corporate website: www.sabafgroup.com.

It is a virtual showcase which communicates in a clear and organic way, the activities of the Group and the companies that compose it, highlighting the specific reference areas of each one.

The operation has also involved the sites of some of the subsidiaries, which have undergone a complete overhaul (ARC - www.arc-gas.it - CMI - www.cmi-hinges.com - FARINGOSI - www.faringosi-hinges.it), alongside www.sabaf.it and www.okida.com.

The goal is to provide stakeholders with a virtual showcase representing the **Sabaf Group**, its companies and its values, offering a complete overview of activities in every corner of the world. With offices in Italy, Poland, Turkey, Brazil and China, 1,300 employees and 440 customers in 55 countries, the time has come to group all the values of the companies' products into a single online container and to offer all interlocutors the opportunity to approach the Sabaf universe in a simple and intuitive way.

The new site has also been created to enhance the identity of each company in the Group. Each subsidiary is an important global point of reference in its field, with know-how of the highest level and a vast assortment of recognized and appreciated quality products, and with an excellent pre and post sales assistance service. What clearly emerges from the new sites, besides the values and purposes shared by the brands, is the transversality of the offer, fuelled and corroborated by the spirit of unity that connects the elements of the **Sabaf Group**.

The revamping of the platforms has followed the principles of simplification so as to provide users with a clear and consistent image, with the same user experience that unites the various worlds that make up the **Sabaf Group**.

The www.sabafgroup.com website includes the Investors section, previously hosted on www.sabaf.it, in which the company publishes all the financial information required by its status as a listed company.

There is also a large section dedicated to Sustainability, in which the Group explains the principles of conduct, commitments and objectives towards its stakeholders and presents the social and environmental KPIs.

Sabaf in short

Founded in the early 1950s, Sabaf has grown steadily to become today, through the Group of the same name, the main producer in Italy and one of the world's leading manufacturers of components for household and professional appliances.

The Sabaf Group now employs over 1,300 employees and is active with the parent company Sabaf S.p.A. and with the subsidiaries Sabaf do Brasil, Sabaf Turkey and Sabaf China (taps, gas thermostats and domestic burners), with A.R.C. S.r.l. (burners for professional cooking), with Faringosi Hinges S.r.l. and C.M.I. S.r.l. (leaders in the production of hinges for ovens, washing machines and dishwashers), with Okida Elektronik (electronic components for household appliances).

The technological know-how, production flexibility and the ability to offer a wide range of components - also designed according to the needs of individual customers, and in line with the specific characteristics of the reference markets - represent fundamental strengths of the Group in a highly specialized sector in which demand is constantly evolving and increasingly oriented towards products that guarantee absolute reliability and safety.
